ABOUT ME

Full-Stack Web Developer Intern and B.Tech 3rd-year student with hands-on experience in building and deploying a real-world e-commerce website. Founder of the Lee Sage clothing brand, where I independently designed, developed, and managed a production-level web application. Skilled in frontend development, backend fundamentals, and AI-assisted coding workflows. Passionate about creating clean, scalable web solutions and eager to grow through a challenging full-stack internship.

WORK EXPERIENCE

Founder & Full-Stack Developer – Lee Sage Clothing Brand 2024 – Present

- Founded and developed Lee Sage, a fashion e-commerce brand.
- Designed, built, and deployed a full working website (leesage.in) independently.
- Developed responsive front-end interfaces using HTML, CSS, and JavaScript.
- Implemented backend logic and dynamic functionality for site operations.
- Built and managed a Shopify-based e-commerce workflow, including product handling and store management.
- Used AI-assisted tools for code generation, debugging, refactoring, and UI/UX improvements.
- Managed end-to-end project ownership, including updates, optimization, and performance monitoring.

PROJECTS

Lee Sage – Full-Stack E-commerce Website

- Designed and built a full working e-commerce website (leesage.in)
- Developed responsive UI and implemented backend fundamentals
- Used AI-assisted tools for development, debugging, and optimization
- Integrated Shopify for product and store management
